

Quality Policy

Ashhurst Engineering is dedicated to providing superior products and services to enhance the success of our clients and stakeholders. The company provides engineering, maintenance and installation services nationally and internationally

In respect of this Ashhurst Engineering will

- Consistently provide products and services which exceed customer quality, budget and scheduled requirements.
- Pursue non-conformance prevention rather than non-conformance detection.
- Have highly skilled and valued employees in a work environment that fosters excellence.
- Maintain a safe and healthy work environment by use of best practices at all levels to ensure reliable risk management.
- Respect the environment and seeking sustainable solutions
- Achieve and maintain sustainable, profitable year on year growth
- Provide strong management commitment to implement, maintain and continually improve the ISO 9001:2008 Quality Management System.

Ashhurst Engineering strives to be the best provider of engineering, maintenance and installation services in the electricity industry. Our goal is 100% customer satisfaction 100% of the time

The company's quality policy is established by management. It is displayed and implemented throughout the facility, demonstrating the company's commitment to quality.

The quality policy is reviewed during the annual Management Review process to ensure it remains relevant and applicable to Ashhurst Engineering's activities and goals
